Plate XXXVI, figs. *s* and *t*, shows two bone fish-hooks which were unearthed. Figs. *u* and *v*, on the same plate, figure two pieces of worked bone which may be fish-hooks in the process of manufacture.

Bone was made into a great number of ornamental objects. Of these, beads were the more numerous in the remains. Bone beads were usually made from the leg and wing bones of birds. Plate XXXVI, figs. *l* to *o*, are bones from which beads have been wholly or partially cut off. Plate XXXVI, figs. *a* to *k*, are beads of different sizes, ranging from an inch and a half to a quarter of an inch in length, and of varying diameters.

"Bracelets" made from the rib bones of small animals are shown in Plate XXXVI, figs. *w* to *z*. These are usually grooved on one side and rounded on the other, and perforated at one end. While calling these bracelets it is difficult to understand just how they were used as such and they may have been simply pendants.

Plate XXXVI, fig. *r*, represents a bone object, with notches on the four sides much like the rectangular stones previously described. This object is flat on one side and curved on the other and has a high polish.

Plate XXXVI, figs. *p* and *q*, are fragments of buffalo shoulder blades which have perforations, their use being uncertain.

FIG. 10. A BONE BUCKLE. ½

Fig. 10 shows a curious piece of bone which probably served as a buckle. It is made of the outside portion of a buffalo rib.

FIG. 11. CARVED BONE OBJECT. ½

The only piece of realistic art found is shown in Fig. 11. This bone is beautifully carved and polished. One end is incised to represent a crane's head, while the rest is rounded off to
